

Geochemisches Seminar ICBM (SoSe 2016)

Dienstags **16:15-17:45 Uhr**, Seminarraum W15-1-146

26.4.2016

Alba Martínez Pérez (Instituto de Investigaciones Marinas, Vigo, Spain)
Linking optical and molecular properties of DOM in the Mediterranean Sea

10.5.2016

Anika Maria Pohllabeln (Marine Geochemistry)
Evidence for abiotic sulfurization of marine dissolved organic matter in sulfidic environments

Marten Fischer (Organic Geochemistry)
Simultaneous trace analysis of nine common plastics in environmental samples via pyrolysis gas chromatography mass spectrometry (Py-GCMS)

24.5.2016

Christian Hansen (Marine Geochemistry)
Experimental investigations on Li and B during serpentinization of ultramafic lithologies

7.6.2016

Maren Zark (Marine Geochemistry)
Universal molecular structures in dissolved organic matter

Philipp Böning (Marine Isotope Geochemistry)
Fe isotopes as important indicator of environmental processes

21.6.2016

Hannelore Waska (Marine Geochemistry)
Assessing the biogeochemical effects of Barrier Islands on the German North Sea: Presentation of the MWK BIME project

Mark Wengler (Marine Geology, AWI Bremerhaven)
Reconstruction of South Pacific dust fluxes and provenance areas: insights from $^{230}\text{Th}_{\text{xs}}$, isotopic and REE data.

5.7.2016

Ronja Paffrath (Marine Isotope Geochemistry)
Rare Earth Elements in the Arctic Ocean
