

How to use LaTeX?

Through the browser

- <https://www.overleaf.com>
- <https://sharelatex.gwdg.de> (through university login, includes free collaboration)

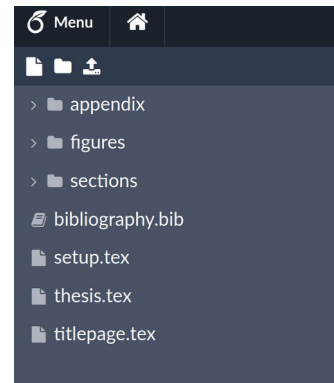

On your local computer

- Install LaTeX (e.g. MiKTeX: <https://miktex.org/>)
- Install an editor (e.g. Texmaker: <https://www.xm1math.net/texmaker/>)

Quickstart (Overleaf/GWDG)

The template should include the following files and folders:

- appendix: Folder containing everything from the appendix
- figures: Folder containing all figures
- sections: Folder containing all section files
- bibliography.bib: File containing all references
- setup.tex: File containing the required packages
- **thesis.tex: Main document file (compile from here)**
- titlepage.tex: The title page

After loading the project (uploading the entire .zip folder), you should be able to compile the document (generate the pdf) by clicking the green button:
